EVERGROW NP Plus (Includes Activator)

Optimised for Poaceae Root Exudates

Sugarcane. Pasture. Cereal Crops.

Evergrow NP Plus is an advanced soil treatment formulated for poaceae root systems– sugarcane, grasses, sorghum and wheat and is highly effective for cover crop grasses, sorghum and wheat and is highly effective for cover crop incorporation. Evergrow NP improves soil and plant health and overall productivity. It increases nutrient availability, nitrogen cycling and phosphorus release. Evergrow NP works to build soil humus and soil structure – improving rooting depth, water infiltration and soil water holding capacity.

ADVANCED FORMULATION

**EVERGROW NP + ACTIVATOR
IN THE ONE DRUM**

DIRECTIONS

- Recommended rate: 4–6 Litre/Hectare. The rate depends on your crop type and crop health. Apply as advised by your agronomist.
- Mix Evergrow NP Plus into water and apply with moisture or during moist conditions.
- Evergrow NP Plus has an accumulative effect and is best applied every 6–12 months depending on your system.
- All application equipment must be cleaned prior to use.

APPLICATION METHODS

- Over dunder, manure, cover crops or compost at the time of light incorporation.
- Through irrigation. Pressure should be below 80 psi at any point in the system.
- Via boom spray. This should be done in damp conditions or followed by irrigation. Higher water rates (400L/ha+) need to be used in the absence of irrigation to wash the product into the soil. In boom sprays the pressure should not exceed 45 psi or 3 bar. Filters should be 50 mesh or larger.
- Via liquid/water injection systems.
- Via aerial application in moist conditions.

Once mixed, must be used within 24 hours.

Reseal immediately after use.

This product is distributed by a certified Metagen agronomist. Consult with your agronomist for specific application instructions for your crop. Ideal timing, rates and method of application can vary across systems.
