SETBEST ATP ENERGY®

Optimising Growth, Flowering and Fruit Set

Setbest ATP Energy® provides powerful support to plants during critical growth periods and during environmental stress. Setbest improves flowering, fruit set, size and quality. Setbest increases nutrient availability (particularly calcium, phosphorus and trace elements).

1L 5L 20L 1000L

SHAKE CONTAINER WELL PRIOR TO USE

DIRECTIONS

Setbest is applied by foliar application and is used in orchards, tree crops, berries, viticulture and tropical fruits. It supports key growth phases and builds plant strength at the core level.

APPLICATION RATE

Apply 2–3L/ha via foliar application.

MIXING DIRECTIONS

- Dilute Setbest in at least 15 parts water to 1 part Setbest.
- Mix with Metagen Hydro TL penetrant for optimum uptake (Add 1L of Hydro TL per 5000L of final mixture)

Setbest is highly versatile and can be applied in conjunction with fertiliser products.

Always test a small area of the crop first to ensure compatibility.

Analysis

| | w/v |
|----------------------------|------|
| Total Nitrogen (N) | 2.3% |
| Nitrate Nitrogen | 0.6% |
| Other Nitrogen | 1.3% |
| Phosphorus – Water Soluble | 1.2% |
| Potassium (K) | 2.8% |

Contains Metagen ATP Biological Material.
Complexes are derived chiefly from plant materials.

This product is distributed by a certified Metagen agronomist. Consult with your agronomist for specific application instructions for your crop. Ideal timing, rates and method of application can vary across systems.
